

London Front Gardens

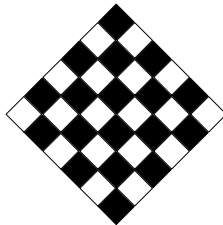

Standard Sheeted Tile System

London Front Gardens (LFG) are proud to introduce a standard sheeted system for "Original Style" Victorian Floor Tiles (VFT) in 2" black and white Dorchester field with Kingsley Border.

Our system is designed for experienced tilers and competent DIY'ers who have had limited exposure to laying VFT. It will also appeal to specialist VFT'ers due to the significant productivity gains achieved by adopting the system over traditional laying techniques. LFG strongly recommends you familiarise yourself with the Original Style's VFT fixing guide.

The system comprises three sections;

36 tile field section

Universal corner section

6 tile border run

We sheet our tiles from the top with a clear self adhesive plastic which is strong enough to maintain the tile spacing but flexible enough to allow the sheet to be worked. It also has the additional benefit of protecting the tiles during installation. All our sheeted tiles have had one coat of HG Impregnator Protector (Product 13) applied.

It is the tilers responsibility to populate the field and cut in the sheets to fit the perimeter of the body, thereafter the universal corners are placed and the border run is laid from each corner to the middle. The tiler will need to exercise care and professional judgement in order to cut in the joint in an aesthetically pleasing manner, thereafter all that is required is to allow the adhesive to dry, carefully remove the plastic sheeting, wipe with white spirits to remove any residue adhesive from the plastic sheeting and then grout.

This system is suitable for residential or commercial use, kitchens, bathrooms, hallways, living areas, garden paths, porches and commercial projects requiring a speedy turnaround.
